

## Catch a Car now part of SBB Trip Planner

**The SBB Trip Planner calculates door-to-door routes using various means of transport. Now it also includes the free-floating car sharing scheme Catch a Car. The aim is to promote combined mobility.**

The SBB Trip Planner not only works out various transportation routes from A to B, it also allows comparisons between the various options based on price and trip duration. The addition of Catch a Car now provides an innovative alternative: the car sharing provider allows one-way trips within an urban area, after which the cars can simply be left in a public parking space. This makes Catch a Car the perfect choice for the first and last mile of a trip. "One day it will be just as natural for everyone to use our scheme as it would be for them to go by bicycle or take the bus," says Catch a Car Managing Director Adamo Bonorva. "That's why it's so important to provide simple, varied points of access and reservation options such as the SBB Trip Planner."

### Close collaboration with SBB

Like its parent company Mobility, Catch a Car collaborates closely with the SBB: both car sharing providers are now integrated in the Trip Planner and the SwissPass. The aim here is to promote combined mobility in Switzerland and show that unlimited mobility is perfectly possible even if you don't have your own car.

### ABOUT CATCH A CAR

Catch a Car AG is a subsidiary of the Mobility Cooperative. It operates Switzerland's first free floating car sharing offer in Geneva and Basel. Customers locate the cars online, drive from A to B, then leave them in a public parking space within a defined zone. Allianz and AMAG are on board as investors, with SwissEnergie and SBB as strategic partners.
